EDUCATION

Dr. Akhilesh Das Gupta Institute of Professional Studies (ADGIPS)

New Delhi, India

Bachelor of Technology in Computer Science Engineering | CGPA: 9.3 / 10.0

Aug. 2024 – May 2028 (Expected)

AWARDS & ACHIEVEMENTS

Winner — Elastic × Google Cloud Hacknight 2026: Built *Vayu Watch*, a live Delhi air quality platform with DPCC/CPCB data, Gemini advisories, and Elasticsearch-indexed real-time history.

National Finalist — Smart India Hackathon 2025: Built *SAHAI*, a full-stack mental health platform with WebSocket chat and RAG-based AI therapy (Pinecone + FastAPI), selected from thousands of teams.

Top 5 in India — NASA Space Apps Challenge 2025 (823 teams): Built *ORBITAIR*, an AQI forecasting platform integrating NASA TEMPO, EPA/OpenAQ, and NOAA feeds with 98% prediction accuracy.

Top 5 & Rs. 7,000 Prize — Smart Delhi Ideathon 2025: Recognized for civic tech innovation combining backend systems and AI for urban problem-solving.

Winner — Paytm × Nerds Room Hackathon 2025: Built *CommuneOS*, an AI platform matching members to mentors via resume parsing in under 5s with live personalized dashboards.

EXPERIENCE

Cimplifi Tech Solutions LLP

Remote

Full Stack Development Intern

Jun. 2026 – Present

- Developed full-stack web applications using React, Spring Boot, and FastAPI, delivering scalable REST APIs, secure JWT auth, and interactive analytics dashboards.
- Engineered automated backend data ingestion pipelines and Selenium worker scripts, reducing manual collection and reporting overhead by **70%**.
- Designed optimized PostgreSQL/MySQL schemas and integrated microservice workflows containerized with Docker.

PROJECTS

Patient Management Service | Java, Spring Boot, Kafka, gRPC, Docker, PostgreSQL, JUnit

[GitHub](#)

- Engineered 4 independently deployable Spring Boot microservices with zero shared state, utilizing gRPC for low-latency RPC and Apache Kafka for high-throughput event streaming.
- Secured endpoints with Spring Security, JWT, and RBAC; validated core modules using JUnit/Mockito and containerized the system via Docker with Maven builds.

ResumeRank | Spring Boot, Next.js, FastAPI, Gemini AI, PostgreSQL, JWT, Docker

[Live](#) | [GitHub](#)

- Developed an AI ATS resume analyzer matching resumes against job descriptions to produce compatibility scores and keyword gap analysis in seconds.
- Architected a scalable three-tier backend (Next.js, Spring Boot, FastAPI) with JWT authentication and integrated Gemini AI for section-wise rewriting.

Multiverse OS | Next.js, React, Three.js, WebGL, Zustand, Tailwind CSS, Vercel

[Live](#) | [GitHub](#)

- Built an interactive portfolio as a simulated OS with a 3D WebGL desktop, custom shaders, a 15+ command CLI terminal, and Zustand global state.
- Optimized 3D rendering via lazy loading and texture compression for sub-3s FCP; automated CI/CD deployment to Vercel via GitHub Actions.

AtmosIQ — PM2.5 Forecasting & Policy Intelligence | Spring Boot, Spring AI, FastAPI, pgvector, React

[GitHub](#)

- Architected an AQI platform pairing a FastAPI ML service (OpenAQ data) with a Spring Boot + Spring AI agent grounded in CAQM GRAP policy text.
- Built a PostgreSQL/pgvector RAG pipeline with citation verification, prompt-injection sanitization, and automated safety guardrails in Docker.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript (basic)

Backend & Systems: Spring Boot, Spring AI, Spring Security, Spring Data JPA, Hibernate, FastAPI, Django, REST APIs, Microservices, Apache Kafka, gRPC, WebSockets, Event-Driven Architecture

Databases: PostgreSQL, MySQL, TimescaleDB, Redis, pgvector, Pinecone (Vector DB), Elasticsearch

Testing & Build: JUnit, Mockito, Maven, Postman, REST API Testing, Selenium

Developer Tools: Docker, Git, GitHub, CI/CD (GitHub Actions), Vercel

Frontend: React.js, Next.js, Three.js, WebGL, Zustand, Tailwind CSS, Leaflet

Certifications: Stanford/Coursera — ML Specialisation (Andrew Ng) | Telusko/Udemy — Java & Spring Boot Development
